

CAMSCRIPTER APP

# Display 3rd-Party Data in a Video Feed

## CAMSCRIPTER APP

allows you to run micro apps directly on an Axis IP camera

### What is CamScripter App?

The CamScripter App is a unique application that allows you to run micro-apps directly on an Axis IP camera. You can choose from our example presets or create your own .js tailor-made micro-apps.

### How does CamScripter App work?

CamScripter App is an application running inside an Axis network camera. In combination with the CamOverlay App, it allows you to embed any data from any source into your video stream.

### What you can do with CamScripter App?

#### Show external data in your live stream

Insert real time data into your live stream from external devices, ie temperature sensors, people counters, industrial scales, including devices with serial ports.

#### Visualize data via infographics

Embed information from your access system in a video stream together with infographics: great for monitoring visitors on your premises.

#### Use it in the closed video circuit

Connect the camera with data from your internal systems and insert them into the video stream which goes to your video management system.

### Features

Add features to your IP camera

Micro apps run as packages

Universal usage

Tailor-made apps to fit your specific needs

UI in micro apps

Public or private usage

# Check our **LIVE GALLERY** and see Axis cameras in action

Our apps power **more than 20,000 cameras worldwide** and many of these live cameras can be seen at [camstreamer.com/live](https://camstreamer.com/live). In the live gallery, you can search among hundreds of beautiful well sorted streams using full-text search or filter them by category or Axis camera type.

## About **CAMSTREAMER**

**CamStreamer is a Czech company based in Prague. As a developer of ACAP apps and cloud solutions exclusively for Axis cameras, the company is an Axis partner for over a decade.**

CamStreamer in-camera apps can livestream with no computer/edge HW or complicated setup needed. Livestreams can be completed with dynamic overlay graphics, mixed with prerecorded videos, and sorted into playlists. External data can be embedded and visualized. The CamStreamer Cloud solution provides easy remote access to cameras without fixed IP or VPN, the ability to create dashboards, or utilize Recording and TimeLapse features.

Do not hesitate to contact us, in case of any questions!
